

1. Backlog – automated 20 %
2. Remaining Backlog (80%) –by June end
3. Feature team is only automating acceptance cases.
4. Time required to run Manual regression cases : 300 hrs
5. As of now automation cases are not used in regression
6. Feature Automation team is not participating in spring planning and retro meeting
7. Current feature automation is n-1 sprint
8. Hitesh and Priyanka to check current stories and acceptance automation
9. Automation Resources 10
10. RGT on one machine whole setup, used to run only automation regression cases.
11. As of now test case development are taking more time, because need to work on scratch.
12. Team is not compatible with specflow and .net
13. Communication gap between in sprint , out sprint automation team and manual testing team
14. Manual Testcase are QAC
15. Currently writing automation as on KT given by SME's for that Module. No Traceability maintained between manual and Automation testcases.
16. Challenge is how to identify cases for regression for that release.
